Subject: RE: Class VI UIC Submission: Information Request

Great. Thank you for confirming and catching my error.

On a related note, you will likely find two versions of the Narrative, Attachments A-G, and QASP now loaded into the GSDT modules. This is because I was unable to delete any of the existing files in the system, only upload new – see example screenshot below. I know in the past I have been able to delete files from the GSDT so am wondering if this is just a glitch in the system.

Please let me know your thoughts.

I'm happy to go back through the modules and delete the original files (from Jan/Feb-2020) and so that only the latest (from Sep-2021) are included.

 Class VI UIC Pre-Operational Testing

Welcome Well and Content Logs MBTs Core Analysis Formation Characterization Injection Well Testing Complete Submission

GSDT
A US Environmental Protection Agency System
maintained by the Department of Energy's Pacific Northwest National Laboratory

CLASS VI PRE-OPERATIONAL TESTING

This submission is for:
Project ID: R09-CA-0002
Project Name: Mendota BECCS Project
Current Project Phase: Pre-Injection Prior to Construction

NOTE: If you have not previously made a submission using this tool it is important to learn what information is required for each of the different data entry fields by reading the [Pre-Operational Testing User Guide](#) (click link to view or download).

This tool facilitates the submission of Class VI pre-operational logging, sampling, and testing results, as well as accompanying interpretation/analysis, pursuant to 40 CFR 146.82(c) and 146.87 or applicable state requirements.

Note that references to EPA's Class VI Rule in the code of federal regulations (CFR) are provided within the tabs of this module. States with Class VI primary have requirements that are at least as stringent as requested in these tabs. If your well is in a primary state, consult your permit.

Click on a tab name at the top of the window, or use the "Next Tab" button. Information can be saved and submitted later using the "Save" or "Save & Submit" buttons until you certify that the submission is complete in the "Complete Submission" tab.

If you have any questions, contact your permitting authority or consult the UIC Program Class VI Well Site CA (available online at <https://www.epa.gov/uic/class-vi-well-site-ca>).

A copy of the Federal Class VI Rule is available online at <https://www.epa.gov/uic/class-vi-rule>.

Upload a proposed pre-operational testing plan here. Please make sure the most up-to-date version of the plan is uploaded.

Proposed Pre-Operational Testing:

Very sorry, Calvin and team. Looks like I missed it somehow. You should be seeing a new notification from the GSDT, "Pre-Operational Testing" module. The revised Attachment G-Construction Details, has been uploaded.

As always, let me know if you have any questions.

Thanks again,
-Rebecca

Hi Rebecca,

We don't see an updated Attachment G. Please resubmit the attachment.

You may transmit the file that contains CBI to EPA and Cadmus using the same method in the past.

Thanks,

Calvin

Subject: FW: Class VI UIC Submission: Information Request

Hi David and Calvin,

You should have seen a slew of notifications from the GSDT site today as we were submitting our response to Information Request #7 and updated permit application material. I wanted to take a quick minute to clarify that:

- Our general response to Information Request #7 was submitted through the GSDT's "Information Request" module, under Request #7, and contained direct responses to EPA's follow-up Requests within the Enclosure
- Resulting revised permit application material, e.g. Project Narrative, Attachments A-G, etc., was uploaded to the GSDT into the appropriate the module, e.g. Project Information Tracking, AOR and CA, Pre-Operational Testing, Project Plan Submission, and Alternative PISC Timeframe Demo, per your request
 - o So, you may have seen multiple notifications from the GSDT today, one from each of these modules
- No Confidential Business Information (CBI) was submitted to the GSDT
- We did not submit updates to the Financial Responsibility Demonstration module at this time
- We submitted our initial response to EPA's consideration of other federal laws, including Biological (ESA) and Cultural Resources (NHPA) studies of the Mendota plant site, to the GSDT's "Information Request" module, under Request #1 (not #7). This was because the initial request from EPA came through Info Request #1.
 - o Hence, you should have received two notifications from the GSDT's Info Request module – attached here for reference.
 - o Note, desktop studies for the larger estimated 3D seismic acquisition area are ongoing and results will be submitted once complete.

As in the past, I will need to transmit a version of the Project Narrative that contains Confidential Business Information (CBI) via a secure means. I will call you tomorrow to discuss. I would like to propose using the same method we have used in the past, i.e. password protected file.

I hope this helps. Thank you and as always, please don't hesitate to reach out with any questions or need anything else.

Best Regards,

-Rebecca
